Scouts of the playgrounds department of the District are scouring the city for playgrounds for the children. These workers are in various sections watching the little children and their places of congregation. Finding of a little group of children on a lot is unusually the means of starting a real playground.

All children want a place to play so that they can have plenty of freedom without the danger of being run over by vehicles, which is ever present when they have to play in the streets. Here's just a little inside tip for the children on how to get a place to play. Find a good lot in the vicin-ity of your home and, if there is no objection from the owner, get your gang and get on it. Start playing.

There are three outstanding weapons that may be used:

To keep about the house a cat or a dog that will regard the rat as its natural enemy and kill it at every opportunity.

To place ordinary wire traps near the holes from which the rats emerge or where they make their runways.

To distribute bait, seasoned with barium carbonate, where the rats will be most likely to find it.

Woodrow Wilson's public repudiation of a brief and innocuously worded message conveyed to a New York political dinner by the man, who for ten years has been his private secretary, none other than Joseph P. Senator Jones of Washington has offered the following amendment to the bill, for the purpose of excluding from the operation of the measure strictly business properties:

"The term 'rental property' means any building or part thereof or land appurtenant thereto in the District of Columbia reated or hired, and the service agreed or required by law or by determination of the commission to be furnished in connection therewith; but does not include (a) any portion of an apartment building, (b) with; but does not include (a) any
